

Assignment 2 - Declaration of contribution

This document supports transparency and accountability for Assignment 2. Your team must submit one PDF that clearly documents each member's contribution to the project. There is no word limit. Any student who does not contribute meaningfully may receive zero for the assignment.

Team member details and contributions

Complete the following table:

Full name	Student ID	Detailed description of contribution
Rodney Lunt	n12555941	Coordinated the project and managed the GitHub workflow (issues, project board, branch/PR discipline, 118 commits across 59 pull requests). Implemented the Singleton (database connection), Chain of Responsibility (middleware pipeline) and Decorator (withOwnership handler wrapper) patterns. Built the Postman auth/admin coverage and the live end-to-end collection run, added the PR-checks CI workflow and c8 code coverage, produced the load-test (NFR-01) evidence, and assembled the report draft including final QA, the GenAI disclosure and reflection sections, README, wireframes and system diagrams.
Lance Masina	n8838411	Implemented the Factory Method (user-response construction), Facade (service-layer cascade deletes) and State (trip lifecycle) patterns. Set up the CI/CD deployment to AWS EC2 and wrote the Section 7 CI/CD write-up. Authored SRS Sections 2.6-2.7 (functional and non-functional requirements) and contributed the Postman trip-CRUD and State-transition request/response evidence. 30 commits across 10 pull requests.
Joseph Milburn	n10813888	Implemented the Builder (trip query/update construction) and Adapter (Open-Meteo weather integration) patterns. Authored the project overview and SRS Sections 2.1-2.5 (purpose, problem, scope, users, constraints), the Discussion and conclusion, and the activity-CRUD and weather Postman evidence with test

		scripts. 21 commits across 8 pull requests.

Declaration

We declare that the information provided above accurately reflects the contribution of each team member. Each listed student has made a substantial contribution to the project in accordance with unit requirements.

Each team member also agrees to:

- Communicate regularly and respectfully within the team.
- Complete assigned tasks on time.
- Attend team meetings and participate actively.
- Address any conflicts through discussion and OLA guidance if needed.
